

ABSTRACT OF THE DISCLOSURE

A PTP case includes a case body having first and second sheet members that are overlapped to each other so as to place a PTP therebetween. The PTP
5 has at least one blister each containing one or more pills. The first sheet member has at least one elongated hole, through which the at least one blister protrudes to the outside, so that the at least one blister is pressed along the at least one elongated hole, thereby sliding PTP along the first and second sheet members. The second sheet member has at least one take-out portion located facing to the at
10 least one elongated hole at such a position as to be matched in position to the at least one blister of the PTP when the PTP has been slid to a predetermined point.
